

ULD OPERATIONS

ULD OPERATIONS

About:

Personnel directly involved in Unit Load Device (ULD) operations are required to train regularly on functions relevant to their job tasks and responsibilities.

ULDs are essential for loading freight transported by air. Although ULDs are required to ensure the safe and reliable restraint of cargo during a flight, the standards for using them vary widely across the industry. The ULD Regulations (ULDR) provides a simple point of reference for common technical and operational standards, regulatory requirements, and carrier requirements applicable to overall ULD operations.

Who should attend

This course is recommended for:

- ❖ Airlines
- ❖ Ground handlers
- ❖ Freight forwards
- ❖ Shippers

Prerequisites

- ❖ There are no prerequisites for this course
- ❖ Recommended level is Entry-level
- ❖ The recommended level of language proficiency is ICAO Operational Level 4 for courses in English or the equivalent level for other languages.

Course format

- ❖ This classroom course provides 3 days (24 hours) of instruction delivered by an Instructor.
- ❖ Student performance will be based on an assessment

Course content

- ❖ Applicability of ULD Regulations
- ❖ ULD limitations
- ❖ Classification and identification
- ❖ Operating specifications
- ❖ Marking, labelling, and documentation
- ❖ Handling procedures
- ❖ ULD certification process

Activities

- ❖ Group exercises

Material

- ❖ Participants will receive a complimentary copy of the ULD Regulations (ULDR) manual

ULD OPERATIONS

What you will learn

Upon completing this course you will be able to:

- ❖ Know what is required to ensure safe and efficient ULD operations
- ❖ Follow ULD Regulations for handling and build-up
- ❖ Work with a range of ULD handling devices and equipment
- ❖ Fulfil your responsibilities as an airline or third party
- ❖ Understand why ULD handling critical to flight safety and operations

DURATION : 03 Days Program
